Ouestions? Call customer service at 800-844-8260

1. Analyze the 3 types of dyslexia and apply compensatory strategies to each specific type, such as

2. Determine the executive cognitive functions and treatment methodologies that impact processing

memory deficits to increase handwriting legibility, reading comprehension, and ability to follow

4. Communicate how to integrate electronic and low tech games into treatment activities to increase

reading comprehension, ability to follow multi-step directions for increased academic success. 5. Identify ICD-10 treatment diagnostic codes and CPT billing codes to properly bill for reimbursement.

6. Establish 3 strategies to improve client's ability to recall multi-step instructions and letter sequence

Choose treatment strategies to address visual perceptual, visual motor integration, auditory and visual

recital, chunking, and mnemonics as they apply to visual and auditory memory.

Target Audience: Occupational Therapists & Occupational Therapy Assistants • Counselors Social Workers • Speech-Language Pathologists • Teachers • School Psychologists • Other Helping Professionals

Dyslexia - the invisible disability that impacts 1:5 individuals!

It's not just an issue of trying harder or paying attention.

You know the stories you hear from your clients - hours of studying just to forget it all on a test the following day, constant lack of ability to understand what they read, difficulty remembering lists or instructions beyond three, the overwhelming frustration of knowing what they want to say or do, but not being able to express it on paper or get the words out, socially withdrawn in attempt to hide their struggles.

In this seminar, you will have the opportunity to practice treatment ideas that will incorporate the use of client-centered everyday routines, games, technology, sensory and hands-on approaches to help your client overcome the challenges of life with dyslexia.

Upon completion of this program, you will be able to immediately provide treatment to address your client's:

- Visual perceptual skills
- Visual motor integration
- Auditory and visual memory
- Reading rate, accuracy, fluency, comprehension
- Phonetic awareness and memory
- Spelling and handwriting struggles

Turn everyday activities into successful treatment!

Speaker =

PENNY STACK, OTD, OTR/L, CLT, is the founding owner of Dyslexia Center of Tulsa, Tulsa, Oklahoma. Penny has over 26 years of experience as an occupational therapist that include working with children who have special learning needs. Penny is also a mother of a child with dyslexia who has shown great success in overcoming reading difficulties.
