### Research, Risks and Limitations

## Objectives

1. Implement interventions to teach children/adolescents diagnosed with High-Functioning Autism (HFA) the skills to independently manage their own regulation, anxiety and fears.
2. Design effective strategies to approach transitions and routine life challenges for children/adolescents diagnosed with HFA.
3. Utilize specific interventions to improve long-term social-emotional success for children/adolescents diagnosed with HFA.
4. Suggest specific sensory-based calming techniques to reduce anxiety for children/adolescents diagnosed with HFA.
5. Recognize the potential side effects of psychotropic medication that can mimic or cause behavioral issues related to HFA.
6. Design specific behavioral interventions to reduce frequency, intensity and duration of difficult behaviors in children/adolescents with HFA.

# HIGH-FUNCTIONING AUTISM

## Proven & Practical Interventions for Challenging Behaviors in Children, Adolescents & Young Adults

This intensive, full-day seminar provides proven intervention strategies, essential treatment tools, and behavioral techniques to help you analyze behaviors and actions, identify consequences for behaviors, and teach new skills to children, adolescents and young adults with high-functioning autism (HFA). Walk away with practical intervention techniques for social success, behavior changes and overcoming challenging co-occurring behaviors that deliver success through adulthood. The challenging co-occurring issues to be addressed are:

- **Social skills**
  - **Sensory**
  - **Depression**
  - **ADHD**
  - **Psychotropic medications**
- **Communication**
  - **Anxiety/Rigidity**
  - **Meltdowns**
  - **OCD**
  - **Non-compliance**

Gain valuable insight into common psychotropic medications, including both the helpful effects and potentially problematic side effects, that these individuals are prescribed. We will explore HFA and the new DSM-5® diagnosis of Social-Pragmatic Communication Disorder. You will receive the necessary tools to gain effective collaboration between clinicians, educators and parents. Through case studies, video clips and class participation you will leave this seminar with the confidence to identify actions that cause impediments in change, utilize more successful consequences for behaviors, and teach new skills to children, adolescents, and young adults with HFA. Don’t just manage these individuals; provide interventions that can lead to successful independence into their adult years!

### Speaker

**Michelle R. Matzke, PsyD**, is a licensed psychologist at Sweetgrass Psychological Services in Whitefish, Montana. She specializes in treating children, adolescents and young adults with Autism Spectrum Disorder (ASD), depressive disorders, anxiety disorders and behavioral disorders. Dr. Matzke consults with school systems, agencies, and organizations to provide the most effective services and interventions to children and adolescents with developmental concerns. She employs evidence-based treatment and interventions and through these interventions has developed social skill curriculums for high functioning children, adolescents and young adults with ASD. In addition, Dr. Matzke has presented in national and statewide conferences regarding topics of trauma and autism. She has a specific passion for helping communities and other professionals learn how to work with individuals on the autism spectrum in ways which encourage healthy independence, hope, and structure to assist these individuals in today’s changing society.

Dr. Matzke earned her doctorate in psychology from Spalding University in Louisville, Kentucky and completed her internship at Child and Adolescent Behavioral Health in Canton, Ohio. She completed her post-doctoral training at Daily Behavioral Health where she specialized in assessing and treating children and adolescents with Autism Spectrum Disorder and comorbid conditions. Dr. Matzke is a member of the American Psychological Association and is dually licensed in the states of Ohio and Montana.
