Outline

Use Neuroscience in the Treatment of Anxiety

Positives: We know more about anxiety-based disorders than any other disorders Science gives explanations, evidence, authority, destigmatizes difficulties

Concerns: It can be difficult to explain.

Concerns: It can be difficult to explain, answer questions

Clients may feel a lack of responsibility Oversimplification is inevitable

Enhancing Engagement in Treatment

Don't neglect the therapeutic relationship! Address the challenges of anxious clients Remember that strategies are effortful Guide the process using client's goals Maintain motivation

Neuroplasticity

Define Neuroplasticity in everyday language Therapy is about creating a new self "Rewiring" as an accessible concept for change

Re-consolidation: the modification of emotional memories

Identify Two Neural Pathways to Anxiety

Amygdala – bottom-up triggering of emotion, physicality of anxiety

Cortex – top-down emotion generation based in cognition

Explain the two pathways to clients

How anxiety is initiated in each pathway and
how pathways influence each other

Client Friendly Explanations

Use illustrations to create concrete understanding
Fight/flight/freeze responses
The "language of the amygdala"
Anxiety and the cortex
Help clients recognize the two pathways to

Neuroplasticity in the Amygdala (Essential for all Anxiety Disorders, PTSD, OCD, Depression)

Sleep and the amydgala The influence of exercise

Breathing techniques to reduce activation Relaxation, meditation, and yoga to modify responses

Exposure as opportunities for the amygdala to learn

Combatting avoidance

When anxiety indicates that the amygdala can learn new responses

Push through anxiety to change the amygdala

Neuroplasticity in the Cortex (Essential for GAD, SAD, OCD, PTSD, Depression)

"Survival of the busiest" principle strengthen or weaken specific circuitry The healthy (adaptive) use of worry in the cortex

"You can't erase: You must replace." Recognize and modify the impact of uncertainty

Training correct uses of distraction Left hemisphere techniques- cognitive defusion, coping thoughts, fighting anticipation

Right hemisphere techniques – imagery, music

Mindfulness and anxiety resistances

Neuroplasticity and Medications for Anxiety Disorders, OCD, PTSD, Depression

Medication's effects in the rewiring process The myth of the chemical imbalance The danger of sedating the brain with benzodiazepines

Promoting neuroplasticity with SSRIs, SNRIs The effectiveness of CBT and meds

Move Beyond Diagnostic Categories to Focus on Anxiety Pathways

Anxiety is a component of many diagnoses (depression, substance abuse, etc.)

Amygdala- and cortex-based techniques help in other disorders

Targeting brain-based symptoms rather than disorders

Worry, obsessions, rumination respond to similar cortex-based techniques
Panic, phobic responses, and compulsions

respond to amygdala-based techniques

Research, Risks and Limitations

Empirical versus clinical and anecdotal evidence

Clinical considerations for specific clients and settings

Efficacy of particular interventions may vary

Rewire the Anxious Brain

Neuroscience-Informed Treatment of Anxiety, Panic and Worry

Objectives

- 1. Ascertain the underlying neurological processes that impact anxious symptoms for clients.
- 2. Develop client engagement in treatment using personalized goals and attending to the therapeutic relationship.
- 3. Evaluate the differences between amygdala-based and cortex-based anxiety symptoms and identify how these symptoms inform treatment interventions.
- 4. Communicate strategies for calming and training the amygdala in order to alleviate symptoms of anxiety.
- Implement methods for teaching clients to retrain the cortex so that anxiety is resisted rather than exacerbated.
- 6. Analyze how psychotropic medication impacts neuroplasticity in the brain; identify related treatment implications.

Rewire the Anxious Brain

Neuroscience-Informed Treatment of Anxiety, Panic and Worry

Featuring neuroscience and anxiety expert,

Marwa Azab, Ph.D.

- Apply brain-based strategies for Panic, Social Anxiety,
 OCD, GAD and PTSD
- Understand the difference between cortex-based and amygdala-based anxiety
- Motivate clients and calm the anxious brain using the power of neuroplasticity
- Increase client engagement by focusing on changing the brain - not simply decreasing anxiety

Rewire the Anxious Brain

Neuroscience-Informed Treatment of Anxiety, Panic and Worry

Join Hannah Smith, MA, LMHC, CGP, licensed psychologist, and learn her keys for successful anxiety treatment. Hannah Smith integrates brain-based strategies for calming the anxious mind with client communication techniques that motivate change in your clients. Her approach promotes adherence to treatment and strengthens the therapeutic alliance - which is essential when working with anxious, worried, traumatized, or obsessive clients. Hannah Smith will give you tools and techniques to:

- Identify and treat the roots of anxiety in both the amygdala and the cortex
- Explain "the language of the amygdala"in an accessible, straightforward way
- · Identify how the cortex contributes to anxiety, and empower clients with strategies to resist anxiety-igniting cognitions

Register today for this workshop and put the power of neuroplasticity to work for you and your

Speaker

Hannah Smith, MA, LMHC, CGP, is the founder of Potential Finders and is the group therapy program coordinator in a top partial-hospital rehabilitation treatment center in the Seattle area. She holds Masters degrees in both special education and counseling psychology and has nearly 20 years of experience both in the US and abroad. Her educational work has been with disorders of cognition and communication, where the role of the brain in learning and memory were primary areas of focus. Clinically, her practice is primarily devoted to the treatment of people recovering from trauma and anxiety disorders. Her experience, both personally and professionally, has allowed her to develop an expertise in incorporating neuroscience into therapeutic interventions in innovative ways. Hannah guest lectures in academic and clinical settings on a variety of topics related to neuroscience and the treatment of anxiety, trauma, and emotion regulation. She is an engaging presenter whose passion is to educate clinicians on practical, whole-person approaches and applications in therapy.

Speaker Disclosures:

Financial: Hannah Smith is the clinical supervisor at The Center; A Place of Hope. She receives a speaking honorarium from PESI, Inc.

Non-financial: Hannah Smith has no relevant non-financial relationship to disclose

Target Audience: Social Workers • Psychologists • Counselors • Teachers • Occupational Therapists • Marriage and Family Therapists • Case Managers • Addiction Counselors • Therapists • Nurses • Speech-Language Pathologists Other Mental Health Professionals

BECOME CERTIFIED!

This course counts toward the educational hours required for certification or Recertification as a Certified Clinical Anxiety Treatment Professional (CCATP).

Visit icatp.com for the full certification requirements.

Live Seminar Schedule

7:30 Registration/Morning Coffee & Tea **8:00** Program begins

11:50 - 1:00 Lunch (on your own)

4:00 Program ends

There will be two 15-min breaks (mid-morning & mid-afternoon). Actual lunch and break start times are at the discretion of the speaker. A more detailed schedule is available upon request.

Questions?
